Education

Shahjalal University of Science and Technology, *B.Sc. in Software Engineering* 2023–Present
CGPA 3.93/4.00 — 2nd among 50 students (Till 6th Semester)

Relevant Coursework

- Data Structures • Object-Oriented Programming • Operating Systems • Computer Networking
- Design Patterns • Artificial Intelligence • Software Verification and Validation • Distributed Systems

Skills

Languages: C++, Java, JavaScript, Python, Dart, SQL	DevOps & Deployment: Docker, Vercel
Frontend & Mobile: React, HTML, CSS, Tailwind CSS, Flutter	Data Analysis: NumPy, Pandas, Matplotlib, Seaborn, Exploratory Data Analysis (EDA)
Backend & APIs: Node.js (Express), RESTful APIs, JWT Authentication	AI/ML: Keras, TensorFlow, LangChain, LangGraph, RAG, ML/DL Model Training
Databases & Services: MySQL, PostgreSQL, MongoDB	Tools: Git & GitHub, Hadoop, Postman, VS Code, Jupyter Notebook, Google Colab
Testing & Automation: JUnit, Selenium	

Experience

Competitive Programming	Competitions
• Solved 1,200+ problems across Codeforces, Codechef, LeetCode, LightOJ, and VJudge. • 🏆 Codeforces: InfiniteBugs 🔗	• 2nd Runner-up — SUST Brainstormers, NASA Space App Challenge 2024 (Sylhet Region). 🔗 Certificate • Participant — CODEX Community Hackathon, SUST CSE Carnival 2026 and IUT 12th ICT Fest Preliminary Round.

Project and Research Works

SUST Spot Booking 🐙 GitHub 🔗 Live Jan 2026–Aug 2026 <i>React, Vite, Tailwind CSS, Node.js, Express, MySQL</i> • Contributed to user authentication, profile management, database design, and frontend development for a full-stack platform for booking on-campus venues at SUST. • Built interfaces for authentication, venue browsing, availability, bookings, profiles, events, blogs, and notifications. • Collaborated with teammates responsible for backend and administrative functionality.	
Explainable Machine Learning Framework 🐙 GitHub 🔗 Paper Status Jan 2026–Present <i>ML, DL, XAI</i> Research work In revision — Heliyon (Elsevier; IF: 3.6; Q1) • Developed a leakage-free ML/DL framework to study social media's effect on academic performance across four independent, cross-country datasets, using SHAP for explainable AI (XAI) interpretability. • Contributed to data curation, investigation, data visualization, and manuscript review & editing.	
Smart Waste Management System 🐙 GitHub Oct 2025–Nov 2025 <i>HTML, CSS, JavaScript, Node.js, Express.js, MySQL, JWT</i> • Built a full-stack waste collection and recycling platform connecting citizens, workers, and administrators. • Added JWT authentication, role-based access and notifications, request tracking, uploads, OTP verification, rewards, and feedback/ratings.	
TrackEase 🐙 GitHub Feb 2025–Jun 2025 <i>Flutter, Dart, Firebase, Google Maps, Provider, fl_chart</i> • Developed a productivity app combining task scheduling, expense tracking, location tracking, and notifications. • Implemented task calendars, monthly summaries, expense filtering, and productivity/spending visualizations. • Integrated Firebase for authentication, cloud data management, and notifications.	
Legal-RAG-BD 🐙 GitHub Jul 2026–Present Research Project (Bangladesh Legal AI) <i>LLMs, RAG, Agent Orchestration</i> • Developing a Bangladesh-focused legal AI system for multi-step reasoning, combining evidence-grounded retrieval, clarification, and uncertainty-aware responses to improve the reliability of legal assistance.	
Soaring Adventure 🐙 GitHub Jul 2024–Sep 2024 <i>Java, LibGDX</i> • Developed a multi-level 2D arcade game with obstacle avoidance, coins, bonus items, and scoring. • Implemented level progression, collision handling, game-over/restart mechanics, sound effects, and Night Mode.	
Additional Projects: Snake Game 🐙 GitHub Calculator App 🐙 GitHub Task Manager 🐙 GitHub	

Leadership & Activities

Vice President — Student Association of Thakurgaon, SUST

- Contribute to student coordination, organizational activities, and community initiatives within SUST.
